

Submission Evidence - Project 6: Time Series Forecasting

Transformation used: Second difference on log data ($d=2$)

ADF p-value: $7.419304549376186e-13$

Chosen model: {'type': 'SARIMA', 'order': (0, 2, 2), 'seasonal_order': (0, 1, 1, 12), 'rmse': np.float64(53.7

Evaluation (1959+): RMSE = 53.73
